

Fibercon®

Fibercon® Pro Vectran

Vectran reinforced for extra performance

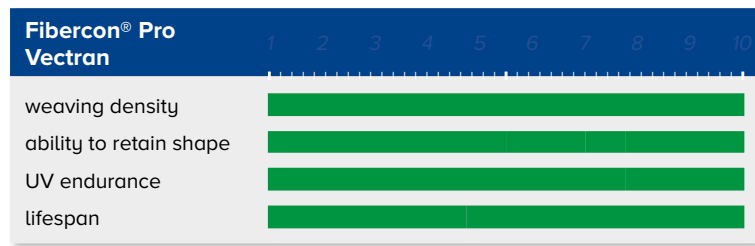

We have developed a **new** style of cloth for yachtsmen who demand extra performance and need greater load bearing strength from their woven sails. This cloth combines the high-quality features of **Fibercon®** yarns with the immense tensile strength and flexibility of additional Vectran yarns.

The finishing of our **Fibercon®** fabrics is geared to your cruising needs or racing aspirations, and every production process is carefully overseen so that you receive a consistent quality of sail.

We recommend a firm Polypreg finish for our **Fibercon® Pro Vectran** cloth. The **firm Polypreg finish** is optimised for the increased diagonal stability needed in more performance oriented sails.

Go the extra mile!
